

Frequently Asked Questions

TYR Anamix® Next, Plain

**Use under medical supervision
 Not suitable as a sole source of nutrition**

What is TYR Anamix® Next?

It is a phenylalanine- and tyrosine-free formula for the dietary management of those with proven Tyrosinemia (TYR). It is Nutricia's very first creamy, fat-containing TYR formula indicated for those past one year of age – making it a GREAT product to transition your TYR infant.

TYR Anamix Next contains fat (including DHA), carbohydrate (including a multi-fiber blend) and protein in form of amino acids.

What is the nutrition profile of TYR Anamix Next?

TYR Anamix Next has an advanced nutrition profile with:

DHA – a long-chain polyunsaturated fatty acid (omega-3 fatty acid). DHA is naturally found in fatty fish. The typical TYR diet lacks fish, which may result in inadequate intakes of DHA. Nutricia has added 64 mg of DHA for every 10 g protein equivalent (P.E.).

Proprietary Multi-fiber Blend – this is a blend of prebiotic (soluble) and insoluble fibers. TYR Anamix Next provides 4 g for every 10 g PE. Fiber, including prebiotic fiber, has been shown to support digestive health.

Updated Vitamin & Mineral profile – based on the most current recommendations by the Institute of Medicine.

Macronutrient profile:

Nutrient (100 g powder)	TYR Anamix Next
Calories, kcal	385
P.E., g	28
Carbohydrates, g	43.2
Fat, g	12.5

What is the age range for this product?

TYR Anamix Next is suitable for individuals over one year of age; will meet most dietary recommendations for toddlers and younger children.

When will TYR Anamix Next launch?

September 2014

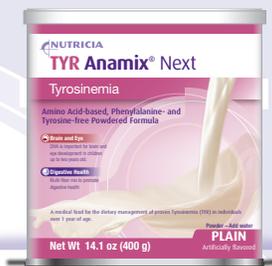

How does the Plain flavored TYR Anamix Next taste?

Taste varies from individual to individual. This product has been formulated with a pleasant and neutral flavor in mind. It will help make the transition from the infant formula to the junior formula seamless for your little one.

Frequently Asked Questions

TYR Anamix® Next, Plain

**Use under medical supervision
Not suitable as a sole source of nutrition**

Are there more flavors?

We are launching a Plain version of TYR Anamix Next in September 2014; currently there are no plans for other flavors.

What is the texture of TYR Anamix Next?

A pleasant creamy texture

***Note** – powdery particles may appear due to undissolved fibers. This is a normal occurrence of products containing this type of fiber.

Can it be used in as a tube feed?

Yes.

What is the shelf life?

Unopened shelf life remains 18 months

How should the product be stored after opening?

Due to the inclusion of DHA, the opened shelf life is 14 days.

Is it possible to drink TYR Anamix Next warm?

It can be prepared with warm water; however the product should not be re-heated once cooled. It also should never be prepared with boiling water. Do not boil or microwave prepared product.

*For optimum taste, patients should be advised to consume this product chilled.

Are there specific mixing instructions for this product?

The product label provides easy to follow mixing instructions on the can. A scoop holding 9 g powder (2.5 g P.E.) is included in the can as well. Please always follow your dietitian's guidance.

Are there household measurements available?

Yes, however we only have these measurements available for healthcare providers; please discuss with your dietitian.

I still have a question that has not been answered, what do I do?
